Agenda

1. Consultation on crisis management protocols

2. Update from the PSS committee

3. General Updates

Discussion

Action / Decision / Suggestion

1. Consultation on crisis management protocols

➤ A preliminary draft of the crisis management protocols was presented to the task force for feedback on the general set-up and on the main presentations (conditions) that are covered by the protocols.

➤ Once finalized, the draft protocols will be shared with the task force for review and feedback.

2. Update from the PSS committee

➤ Last year within the PSS committee, key messages were developed on the protection of children from violence, and a facilitation guide that explains how to use these key messages. The key messages were chosen by all NGOs working in PSS programming.

➤ Objective: to provide awareness sessions for parents.

➤ The awareness sessions to groups of parents are structured as such: movie is shown, feedback is collected, the movie is run a second time, then the group decides what messages they would like to discuss during the session.

➤ A printable version of the leaflet is available. Any NGO can have it and print it out.

➤ An Arabic version will be available soon.

➤ The following is the YouTube link of a video highlighting the messages: <http://youtu.be/DXEOWklAjsg>

➤ The leaflet and facilitation guide will be shared with the task force by email.

3. General Updates

➤ **TF Action plan 2016: Action 4: Develop and report on key indicators on MHPSS community service utilization**

- In preparation for the implementation of this objective, the first step that the task force has agreed on is to gather the indicators routinely collected by task force organizations in order to have a sense of the types and numbers of indicators that are used.
- A collection form prepared by the National Mental Health Programme was shared with the TF for organizations to fill with the MHPSS indicators they are collecting (type only) as per the example given in the table.
- An official request to the management of organizations may be sent if needed.

➤ Medications:

- In order to increase the access to psychotropic medications for non-Lebanese, the following medication (risperidone 4mg and 1mg/ml) is currently available at the MOPH.

➤ All TF organizations are encouraged to fill the form and send it as this is a key exercise that will contribute to better planning.

➤ To get a 3 month stock of the above medication (based on available MOPH stocks), each organization which provides psychiatric consultation for non-Lebanese is to fill the attached request form and to let their psychiatrist sign it and stamp it.

➤ Deadline to send the forms back: Thursday March 17, 2016.

Next meeting: Wednesday April 26, 2016 at 3:30pm in the WHO Conference room (-1), Lebanese University Glass building, Mathaf.
