Subject: **URGENT MEDICAL DEVICE RECALL (REMOVAL) – LOT SPECIFIC**

Affected Product: Various Polyethylene Implants

Zimmer Biomet is conducting a lot specific medical device field action for various polyethylene implants. The affected products are being removed due to the potential presence of elevated endotoxin levels that exceed the specification limit. The issue was discovered during routine bacterial endotoxin testing (BET). There have been no complaints received, related to this issue.

Endotoxins (pyrogens) are substances found in certain bacteria. The FDA-adopted standard for endotoxin levels is 20 EU/device. There were three polyethylene implant samples during an approximate 6 week period that were found to exceed this level. As a result, the polyethylene implants manufactured during this period are being removed. Affected products that have the potential to exceed process limits for endotoxins could present the potential risks described below:

Risks		
Immediate health consequences (injuries or illness) that may result from use of or exposure to the product issue.	Most Probable	Worst Case
	No immediate health consequences anticipated	No immediate health consequences anticipated
Long range health consequences (injuries or illness) that may result from use of or exposure to the product issue.	Most Probable	Worst Case
	Inflammatory conditions; adverse tissue reaction	Aseptic loosening; revision surgery
