Field Safety Notice

about a FSCA

- Recall -

Berlin, Jan 10th, 2019

Reference-No.: Call# 21058886
Recipient: All customers according to lot vs. sales data from the traceability run in our ERP-System

Identification of medical devices affected:

Medical device: Lambotte chisel, 20mm
Product description: Chisel for manipulation/fixation of the bone slit during an osteotomy treatment
Product/Article #: IU 3000-20
Lot code: IU 3000-20 Lot# I011
IU 3000-20 Lot# I012
IU 3000-20 Lot# I013
IU 3000-20 Lot# I014
IU 3000-20 Lot# I015
IU 3000-20 Lot# I016
IU 3000-20 Lot# I017
Dear valued customer,

due to a recent complaint by one of our customers regarding a broken Lambotte chisel we realized a non-conformity. The evaluation of this non-conformity indicated the suspicion for a systematic deviation. Therefore, we initiated a serious and detailed preventive inspection of all chisels in stock.

After detailed analysis of the available products we were able to identify the root cause of the original complaint as well as a systematic deviation caused by a supplier of us.

The break of the welded piece parts “chisel body” and “knocking plate” was caused by an unauthorized change of the welding technology by the supplier of these parts.

We also counterchecked parts welded in accordance with the ordered and confirmed specification and got proof again that correct manufactured parts are still safe and effective.

Even if the number of delivered articles is very small, we are obliged to prevent any further occurrence of break during treatment procedures and with this, the risk of procedure prolongation or harm to patients and other parties involved in the treatment procedure.

In consequence we have opened a CAPa-case in accordance with the regulations for medical devices and initiated immediately this FSCA.

Remaining risks caused by the ongoing use of the non-conforming product/article are checked and evaluated by the subsequent risk analysis of the product/article.

<table>
<thead>
<tr>
<th>high probability</th>
<th>The chisel parts will lose integrity (break into two piece parts) during treatment (hammering to the knocking plate)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk</td>
<td><strong>Short-term</strong> health consequences: contamination of the treatment area, additional injury of tissue/bone. Contusion of the holding hand of the user with a risk for contamination.</td>
</tr>
<tr>
<td></td>
<td><strong>Long-term</strong> health consequences: inflammation caused by contamination</td>
</tr>
</tbody>
</table>
| Evaluation       | The loose part may remain on a small rest of the welded structure, may drop down the floor or in worst case into the treatment area. In worst case (low probability) the part can be taken-off by e.g. a forceps. Even this would occur in a cleaned surrounding additional injury could be caused and inflammation in consequence of contamination could occur. In very seldom cases a contusion of the holding hand including contamination is thinkable.  
The remaining chisel body can be removed by an additional tool or the hammer itself and/or smooth through and back motions. This has also a low probability of additional injury of tissue or bone but is to be estimated not higher than the risk during the normal treatment itself. |
| Decision         | Evaluation of all risks (probability and severity) and possible consequences lead to the decision for the FSCA (Recall) of all parts in the field to prevent any further occurrence. |
Please take the following measures without delay:

1. Please immediately remove all products/articles of the affected lot numbers from your stock to secure any further use.
2. With this letter you will receive a confirmation form, please complete it completely, sign it and send it back to us immediately after receiving this information. If you do not have any affected products, please fill out the confirmation form and fax it to 0049 (0) 30 750 19 111 or mail it to incident@aap.de.
3. Please return all affected products/articles immediately to us.

Forwarding the Field Safety Notice:

Please ensure that all users of the specified products in your organization and all other applicable persons receive notification of this "Field Safety Notice". If the products have been transferred to third parties, please forward a copy of this safety notice or inform the contact person specified below.
Please retain this information at least until all affected products have been returned to us.

The national regulators have been informed of this action.
The Federal Institute for Drugs and Medical Devices has received a copy of this "Field Safety Notice".

Contact: Should you have any queries, please do not hesitate to contact:
